TO: ALL AGENTS

**Introducing... Another New Enhancement to the GDM Web Site**  
*MSB Residential Reconstruction Cost Estimator*

Grain Dealers Mutual Insurance Company has added another new feature to our Web Site that will ease the process of doing business. Under Quotation Tools on the Agents Authentication Page, you will now find an option entitled, MSB Entry & Editing. This is your new automation tool for calculating reconstruction cost for homeowners and dwellings.

Effective immediately, you should discontinue using the old paper format and begin submitting this new electronic version with your new applications. In addition to generating reconstruction cost valuations for your new business, you will also be able to view and edit calculations that have been developed for your existing homeowners and dwelling policies.

We are excited to make this new automation tool available to our agents in our continuing efforts to provide exceptional services and tools that help you to work easily and with efficiency. If you have any questions, suggestions, or comments, please contact your underwriter or the Agency Supervision Department at 800-428-7081.
